

# IELTS Writing Evaluation Report

Order ID: #60145

Name of Candidate: Natnapin ARCHINT

Date: 12-04-2021

Examiner Code: RTA/AP/22

Band Scores		
Descriptor	Task 1	Task 2
Task Achievement	7	7
Coherence & Cohesion	6	5
Lexical Resource	6	6
Grammatical Range Accuracy	6	6
Overall	6.0	6.0

**FINAL SCORE: 6.0\***

\*If the examiner is strict, your score may fall to 5.5

## Task 1

<b>Task Achievement</b>
Covers the requirements of the task. Presents a clear overview of main trends, differences or stages. Clearly presents and highlights features/bullet points but could be more fully extended
<b>Coherence and Cohesion</b>
Arranges information and ideas coherently and there is a clear overall progression. Uses cohesive devices effectively, but cohesion within and/or between sentences may be faulty or mechanical. May not always use referencing clearly or appropriately
<b>Lexical Resource</b>
Uses an adequate range of vocabulary for the task. Attempts to use less common vocabulary but with some inaccuracy. Makes some errors in spelling and/or word formation, but they do not impede communication
<b>Grammatical Range and Accuracy</b>
Uses a mix of simple and complex sentence forms. Makes some errors in grammar and punctuation but they rarely reduce communication.

## Task 2

### Task Achievement

Addresses all parts of the task. Presents a clear position throughout the response. Presents, extends and supports main ideas, but there may be a tendency to over generalise and/or supporting ideas may lack focus.

### Coherence and Cohesion

Presents information with some organisation but there may be a lack of overall progression. Makes inadequate, inaccurate or over-use of cohesive devices. May be repetitive because of lack of referencing and substitution. May not write in paragraphs, or paragraphing may be inadequate.

### Lexical Resource

Uses an adequate range of vocabulary for the task. Attempts to use less common vocabulary but with some inaccuracy. Makes some errors in spelling and/or word formation, but they do not impede communication.

### Grammatical Range and Accuracy

Uses a mix of simple and complex sentence forms. Makes some errors in grammar and punctuation but they rarely reduce communication.

# WRITING TASK 1

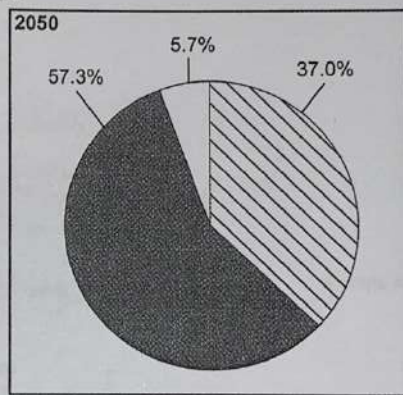

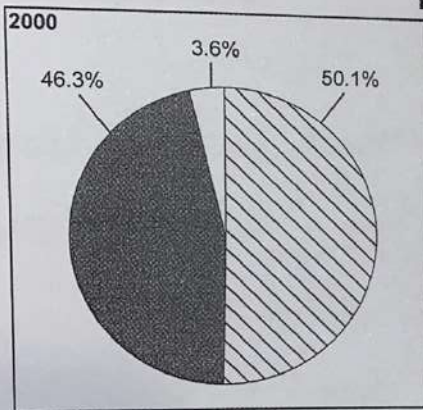

You should spend about 20 minutes on this task. Write about the following topic:

The charts below give information on the ages of the populations of Yemen and Italy in 2000 and projections for 2050.

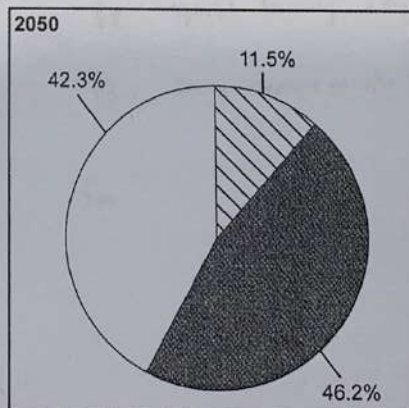

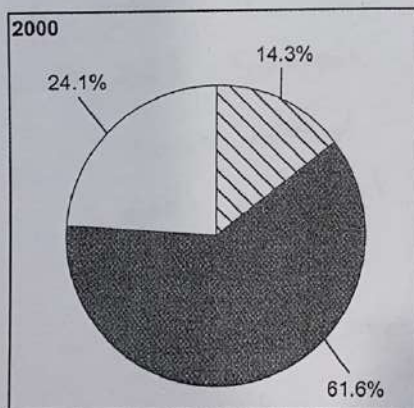

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

## YEMEN

## ITALY

0-14 years

15-59 years

60+ years

Test 3 Task 1

The pie charts illustrate the proportions of the populations of Yemen and Italy in ~~different~~ <sup>average</sup> ranges in 2000 with the projections for 2050. ~~The charts~~ <sup>people were</sup> divided ~~people~~ by age into three groups as children with age 0-14, middle-age people with 15 to 59 years of age, and elderly people with over 60 years of age.

In 2000, about half of Yemen's population ~~were~~ <sup>were</sup> children, and only 3.6 percent of people in the country ~~have~~ <sup>were</sup> their age over 60. While almost one-third of Italians ~~were~~ <sup>were</sup> in their mid-age range, and there ~~was~~ <sup>was</sup> much bigger proportion of elderly people in Italy than in Yemen with around 24 percent. The smallest group of ~~population~~ <sup>people</sup> in Italy ~~was~~ <sup>was</sup> the children which ~~counts~~ <sup>accounted</sup> to around 14.3 percent.

From the ~~regressions~~ <sup>projections</sup> of population segments in 2050, it shows the rise ~~in~~ <sup>in</sup> the average age in both ~~the~~ <sup>the</sup> countries. Yemen's population ~~will~~ <sup>will</sup> have smaller ~~percentage~~ <sup>percentage</sup> of children ~~and~~ <sup>but</sup> it ~~will~~ <sup>will</sup> shift ~~to~~ <sup>to</sup> the mid range instead. Nevertheless, the percentage of children in Yemen will still outnumber the Italian population with 37 percent in Yemen compared to 11.5 percent in Italy. ~~The~~ <sup>The</sup> number of elderly people will dramatically increase up to around 42 percent ~~of~~ <sup>of</sup> the Italian population.

The middle-age people will be the dominant ~~ly~~ <sup>ly</sup> in both ~~the~~ <sup>the</sup> countries with over the half of ~~the~~ <sup>the</sup> population ~~and~~ <sup>and</sup> it will ~~come~~ <sup>come</sup> to 46.2 percent in Italy.

Chart cannot divide people in different age groups, therefore, it is wrong to word your sentence in this manner.

Here, you are comparing different things. For Yemen, you reveal data for children and elderly and then compare it with mid-age range and elderly Italians. This is incorrect way of comparison. You must compare children and elderly population demographics of both countries. Also while has been wrongly used as a cohesive device. Rephrase it like this:

Whereas, a much bigger proportion of Italian population comprised of elderly people (24.1%) and children were the minority age group in the country at only 14.3%.

What do you mean by regressions of the population? Rephrase it:

The population projections for the year 2050 show rise in the average age in both the countries.

Word Count – approx. 221 words, ok, if you did not run out of time. Aim to keep between 170-200 max.

## **WRITING TASK 2**

*You should write at least 250 words.*

*You should spend about 40 minutes on this task.*

**Some people say that the best way to improve public health is by increasing the number of sports facilities. Others, however, say that this would have little effect on public health and that other measures are required.**

**Discuss both these views and give your opinion.**

Give reasons for your answers and include any relevant examples from your own knowledge or experience.

Test 3 Task 2

Good public health is ~~the~~ <sup>an</sup> indicator of people's wellness and some people believe ~~that~~ <sup>different</sup> that building more sports facilities is the best way to improve it, while others see that ~~measures~~ <sup>are</sup> also required to ~~increase~~ <sup>improve the</sup> the effectiveness of improving public health. This essay will discuss on both views and give the reasons ~~for~~ <sup>for</sup> why increasing the number of sports ~~facilities~~ <sup>facilities</sup> would not be the most effective way ~~to do so~~ <sup>to improve public health as compared to other</sup> ~~compared to other~~ <sup>aspects. Solutions</sup> ~~there~~ <sup>there</sup>.

In order for people in a city to have ~~an improvement in public health~~ <sup>a better health</sup> ~~that~~ <sup>there</sup> are a lot of measures to be considered. For instance, ~~of the important aspects~~ <sup>of the important aspects</sup>, cleanliness of people's everyday ~~intakes~~ <sup>intakes</sup> can have ~~the~~ <sup>a</sup> direct effect ~~on~~ <sup>on</sup> their health. Another point is the immunity of people against getting sick, which can be improved by many factors.

Building new sports ~~facilities~~ <sup>facilities</sup> that interest people to come for exercise is one of the ~~best ideas~~ <sup>best ideas</sup> to make ~~these~~ <sup>these</sup> people stronger and healthier. It is known that exercise can ~~strengthen~~ <sup>strengthen</sup> the body inside out and it also helps ~~to increase~~ <sup>to increase</sup> the immunity ~~to~~ <sup>against</sup> diseases. A person who exercises tends to stay better in shape and has less risk ~~of~~ <sup>of</sup> ~~obesity~~ <sup>of</sup> ~~or~~ <sup>sustaining from</sup> heart conditions. Unfortunately everything comes with costs. ~~It is undeniable~~ <sup>It is undeniable</sup> that increasing fitness centers or biking tracks requires a lot of investments, especially to make sports facilities accessible to everyone.

The government should invest the right amount of money in other aspects as well to maximize the improvements in public health. ~~good~~ <sup>good</sup> policies can be made to ensure that people will not be prone to ~~sick~~ <sup>sick</sup> of getting sick as well as to enhance their protections against diseases. There are various ways to do ~~for~~ <sup>for</sup> example, setting standards ~~for~~ <sup>for</sup> ~~the~~ <sup>the</sup> market on the cleanliness to get rid of infections ~~from~~ <sup>from</sup> rats or improving waste management. ~~to~~ <sup>waste should</sup> be properly decomposed instead of letting people dump ~~it~~ <sup>it</sup> into the ~~canal~~ <sup>canal</sup> that is used for households. Furthermore, some diseases are infectious and hard to be cured like malaria or covid-19 ~~and~~ <sup>and</sup> people should properly get vaccinated to reduce the risk of spreading. ~~In addition~~ <sup>In addition</sup>, ~~health~~ <sup>health</sup> ~~care~~ <sup>healthcare</sup> facilities also play an important part in standardized public health ~~and~~ <sup>and</sup> ~~which~~ <sup>which</sup> ~~later~~ <sup>later</sup> has the direct effects on its ~~enhancement~~ <sup>enhancement</sup>, ~~improvement~~ <sup>improvement</sup>.

It is important that ~~countries~~ <sup>countries</sup> ~~people~~ <sup>people</sup> should have a good public health system but in order to improve it, ~~it is not limited to~~ <sup>it is not limited to</sup> increasing sports facilities ~~is not enough~~ <sup>is not enough</sup> but it takes a lot more efforts on other aspects as well to increase ~~the~~ <sup>the</sup> ~~effectiveness~~ <sup>effectiveness</sup>.

According to the question: some people believe that increasing sports facilities can increase public health. Others think that this will not have significant impact and that other measures should be pursued. It does not mean that other measures should be taken in addition to building sports facilities. You have written "different measures are also required" which is wrong because these measures are not in addition to building sports facilities.

It is wrong to say - people have improved public health. Health of a population collectively is referred to as public health.

The second paragraph is unnecessary and not directly relevant to what has been asked in the question. You simply need one paragraph to suggest how sports centers can improve public health and a second paragraph to explain why this is not enough and what other things can be done.

You have said that sports centers are best for improving public health. But in the introduction you said that sports centers will not be that effective. So what is your opinion? You are confusing the reader and this spoils your CC and TR. At the end of this paragraph, you have said that it is quite costly to build fitness centers. I guess you want to highlight this as its drawback but it needs to be framed better. Also, this point is not convincing enough. A solution can be costly but it does not mean that the solution will be ineffective in solving the problem. This will not fetch you points in TR.

In this paragraph, the first two sentences have similar meanings. This is redundancy. There are too many ideas in this paragraph and none of them are sufficiently explained.

**Word Count – around 450 words. Too long. Keep it between 270-300 words**
