

IELTS Writing Evaluation Report

Order ID: #60145

Name of Candidate: Natnapin ARCHINT

Date: 12-04-2021

Examiner Code: RTA/AP/22

Band Scores		
Descriptor	Task 1	Task 2
Task Achievement	6	6
Coherence & Cohesion	5	6
Lexical Resource	6	6
Grammatical Range Accuracy	5	5
Overall	5.5	5.5

FINAL SCORE: 5.5

Task 1

Task Achievement
Addresses the requirements of the task. Presents an overview with information appropriately selected. Presents and adequately highlights key features/bullet points but details may be irrelevant, inappropriate or inaccurate.
Coherence and Cohesion
Presents information with some organisation but there may be a lack of overall progression. Makes inadequate, inaccurate or over-use of cohesive devices. May be repetitive because of lack of referencing and substitution.
Lexical Resource
Uses an adequate range of vocabulary for the task. Attempts to use less common vocabulary but with some inaccuracy. Makes some errors in spelling and/or word formation, but they do not impede communication
Grammatical Range and Accuracy
Uses only a limited range of structures. Attempts complex sentences but these tend to be less accurate than simple sentences. May make frequent grammatical errors and punctuation may be faulty; errors can cause some difficulty for the reader.

Task 2

Task Achievement

Addresses all parts of the task although some parts may be more fully covered than others. Presents a relevant position although the conclusions may become unclear or repetitive. Presents relevant main ideas but some may be inadequately developed/unclear.

Coherence and Cohesion

Arranges information and ideas coherently and there is a clear overall progression. Uses cohesive devices effectively, but cohesion within and/or between sentences may be faulty or mechanical. May not always use referencing clearly or appropriately.

Lexical Resource

Uses an adequate range of vocabulary for the task. Attempts to use less common vocabulary but with some inaccuracy. Makes some errors in spelling and/or word formation, but they do not impede communication.

Grammatical Range and Accuracy

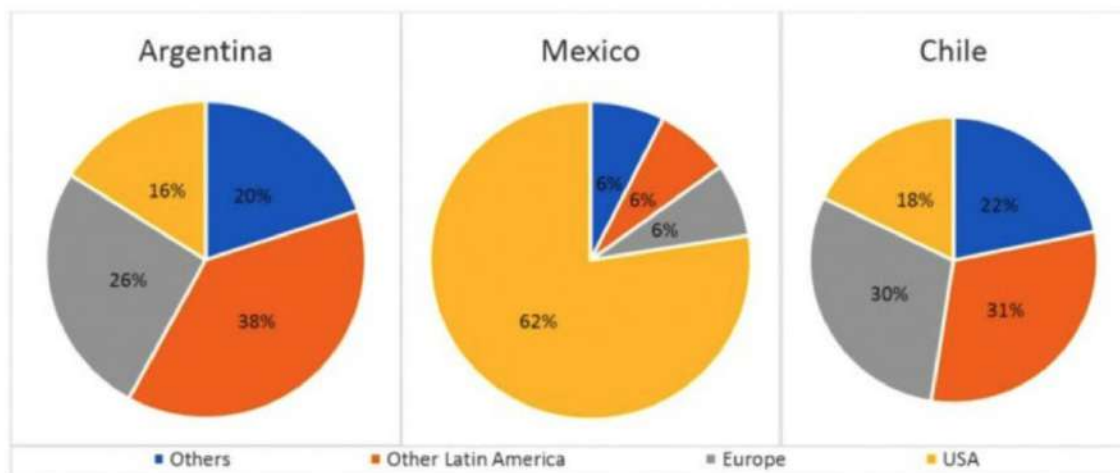

Uses only a limited range of structures. Attempts complex sentences but these tend to be less accurate than simple sentences. May make frequent grammatical errors and punctuation may be faulty; errors can cause some difficulty for the reader.

WRITING TASK 1

You should spend about 20 minutes on this task. Write about the following topic:

The pie charts show the destination of export goods in three countries in 2010. Summarise the information by selecting and reporting the main features and make comparisons wherever relevant.

Write at least 150 words.

Task 1 : PIE CHARTS (3rd one on the web)

The destination of export goods of ~~the~~ three countries in Latin America in 2010 ~~is~~ ^{are} shown in the pie charts. ~~(For each country including Argentina, Mexico, and Chile)~~ The goods exporting destination ~~comprises of~~ ^{comprises} ~~of~~ ^{three} ~~groups of~~ ^{groups} ~~countries~~ ^{which are} the USA, Europe ~~and~~ ^{and} other Latin ~~America~~ ^{countries} ~~and~~ ^{and} the countries elsewhere.

It is noticeable ~~that~~ ^{that} most of the goods were exported ~~within~~ ^{within} the continent, especially ~~for~~ ^{for} Mexico that sent the biggest ~~part~~ ^{chunk} of the exports to the USA, but the proportion of the outgoing products ~~in~~ ^{by} Chile were sent outside the America.

While a ~~dominant~~ ^{majority} number of ~~its~~ ^{its} products were sent ~~from~~ ^{from} Mexico to the USA, the ~~biggest~~ ^{maximum} ~~ratio~~ ^{exports were done} belonged to Latin American countries with 38% ~~from~~ ^{from} Argentina and 31% ~~from~~ ^{from} Chile. Apart ~~from~~ ^{from} the USA, Mexico only sent 6% of each ~~country~~ ^{country} ~~group~~ ^{to} in 2010 while Argentina sent 15% of theirs to the USA, similar to Chile with 18% ~~with~~ ^{with} ~~other~~ ^{other} ~~countries~~ ^{countries} elsewhere.

Apart ~~from~~ ^{from} goods exporting ~~inside~~ ^{goods to} the American continent, Chile sent over the half of their ~~outgoing~~ ^{outgoing} products elsewhere - which ~~comprised of~~ ^{comprised of} 30% to Europe and 29% to ~~countries in~~ ^{other miscellaneous countries} Asia, Africa and Australia. Slightly less than half of Argentinian exporting goods were also delivered outside America ~~with~~ ^{with} the number of ~~44%~~ ^{44%} which ~~with~~ ^{with} 26% of them ~~were dealt~~ ^{were dealt} with European countries.

You should not copy phrases from the question. "The destination of export goods" is directly copied from the question. The name of the countries should be written after "...countries in Latin America".

While Europe and other Latin America can be referred to as group of countries, the USA and 'others' category cannot be brought under this category. USA is one country. So this is an error.

Change "goods exporting destinations" to "destinations of export" as the earlier version is incorrect.

USA is part of North America together with Canada and this is one continent. Chile, Mexico and Argentina are part of South America together with Brazil and others. This is a different continent. So, when you say "...goods were exported within the continent", it is incorrect. Also, the factual presentation of data is incorrect. For example, you have said that most goods were exported within the continent is factually incorrect.

You have compare things in a random manner and there is no overall progressions.

There is nothing like American continent. There is North America and South America.

Word Count – approx. 221 words, ok, if you did not run out of time. Aim to keep between 170-200 max.

WRITING TASK 2

You should write at least 250 words.

You should spend about 40 minutes on this task.

Nowadays technology is increasingly being used to monitor what people are saying and doing (for example, through cellphone tracking and security cameras). In many cases, the people being monitored are unaware that this is happening. Do you think the advantages of this development outweigh the disadvantages? Give reasons for your answer and include any relevant examples from your own Knowledge or experience. You should write at least 250 words.

Task 2 : Science and Technology (1st one on the web) **F is capital**

Technological advancement brings a lot of useful **data** applications to improve human life. **More data is being** processed everyday for multiple purposes and one of them is to **keep monitoring** people's actions. Although, sometimes people are aware that they **are being** tracked by the system, there are multiple situations **where** people are monitored without **their knowing**. **This essay will discuss on both sides whether this trend of observing people everywhere has more benefits or drawbacks.**

There have been several developments in the last decades **that utilize data** in the purposeful ways **that bring specific reasons, such as** security cameras **and** tracking via the smart phones. Most of the times, **this data like video monitoring activities** inside a bank is used for proactive protection. The cameras have been **used for** recording the illegal **activities** such as a robbery **and present recordings** in a form of evidence **in** courts. In addition, information can also be collected **for a personal purpose** for instance, health and fitness tracking system **that is used** to continuously monitor health condition of a person. **It keeps** the user notified whether he is dehydrated. Using the collected data in the right way results in countless **of benefit** for everyday life.

Misuse of Data **being misused** can lead to a serious problem. Nowadays, a number of laws regarding the use of personal information have been **implemented** to protect the rights of a person in controlling his own data. This is **because** many personal data **are being stored** for inappropriate purposes such as commercial or personal abuse. Sometimes, there **is** some personal data **that is useful** for some companies, **and is being used** without consents. A lot of times we see a relevant advertisement without noticing that our data **has** been processed in some way to customize that particular ad **which is likely** to interest us. Although, it might seem fine, **for some people** it might creep out sometimes **people**. The more serious example of violating **privacy** **personal rights** is using a technology **is when someone is being recorded on a camera** in the a private space like in a house or a public restroom. Personal data should be utilized within the boundary of regulations and privacy consents **and this is the way it works** in this technology disruption era. **this sentence is not required.**

A lot of data have been processed to serve many useful applications. But it is important that **use of data being used** are not violated **any** privacy protocols. Advancement in computer technology **is** continuing to enhance our everyday and **future** life by using our consented personal data should be the right way to do.

Overall, there are too many grammatical mistakes which makes it extremely hard to understand your essay. Therefore, you get 6.0 in GRA. In the entire essay your opinion is not clear whether this trend has more advantages or disadvantages. This negatively affects the score in TR and CC.

This essay will discuss both side...Instead of this sentence, you should write an outline sentence. For example, Although being under surveillance has some advantages like increased security against theft and robber, I believe that it has more serious drawbacks like breach of privacy. This was you can give a brief outline about your essay and also express your opinion.

The beginning of this paragraph is not appropriate. The question is not about use of data but about monitoring people with cellphone tracking and security cameras. When you generally mention data it can refer to anything and expands the scope of your argument and disrupts the flow of your essay. Thereby costing you marks in CC and TR. The second example of tracking personal health is not relevant to this task. The question is about surveillance.

In this paragraph, you have mentioned about laws to protect privacy of people. However, this paragraph is about disadvantages of surveillance. So it would make more sense if you first discuss disadvantages of surveillance and then mention the laws.

The conclusion is not at all clear and focusses on data not surveillance.

Word Count – around 450 words. Too long. Keep it between 270-300 words
